Real Intelligence, Not Artificialia

Why Clinic.co?

We believe in CARE, and the continuity of it. We also believe everyone should have access to the high quality care and telemedicine is a vital tool to provide that. At a time when trying to minimise transmission of COVID-19, minimising patient contact while still providing care is vital. Virtual consultations enable that.

Empowering Clinicians

Governance

Governance is core to Clinic.co. No video is recorded (on the users device or elsewhere) and no patient data is stored. The platform is open to all with an NHS.net account. Contact us if you don't have one.

Security

All data is AES 256 encrypted. Clinic.co uses SSL / TLS 1.2 and is compliant with GDPR, HIPAA and NHS standards. We are ISO 9001 and 27001 Certified and ICO registered. We can supply DPIA and DCB0129 documentation for Information Governance Requirements.

GPs, Specialists, Nurses and Therapists

How is Clinic.co free?

Clinic.co is brought to you by the team that made GoodSAM for the Emergency services.

We passionately believe that every clinician should have access to a secure telemedicine platform enabling them to see and manage patients wherever they are without expensive licence fees or huge cost to the NHS. To make the system sustainable we will be releasing advanced tiers of Clinic.co with additional features.
